LAB 4: ASSIGNMENT ABDULLAH WASIM 19B-007-SE

In [3]:

```
# Q1 : Quadratic formula

from math import sqrt
a = int(input("The value of a:"))
b = int(input("The value of b:"))
c = int(input("The value of c:"))

if a == 0:
    print("The equation cannot solve because the denominator can't be Zero")
else:
    x1 = (-b+sqrt(b**2-4*a*c))/2*a
    x2 = (-b-sqrt(b**2-4*a*c))/2*a
    print("The Value of x1 is:" ,x1)
    print("The Value of x2 is:" ,x2)
    print("Thank you Your Question is solved.")
The value of a:2
```

The value of a:2
The value of b:4
The value of c:2
The Value of x1 is: -4.0
The Value of x2 is: -4.0
Thank you Your Question is solved.

In [1]:

```
# Q2 : nth term

a1 = int(input("Enter the value of 1st term:"))
d = int(input("Enter the value of Common difference:"))
n = int(input("Enter the value of nth term:"))
an = a1 + (n - 1)*d
print("The nth value of the sequence: ", an)
x = str(input("Do you want to continue yes or no:"))
if x == 'yes':
    n2=int(input("Enter the value of 2nd term:"))
    an1 = a1+ (n2-1)*d
    print("nth term of the 2nd sequence is:", an1)
else:
    print("Thank you")
```

Enter the value of 1st term:3
Enter the value of Common difference:6
Enter the value of nth term:35
The nth value of the sequence: 207
Do you want to continue yes or no:yes
Enter the value of 2nd term:45
nth term of the 2nd sequence is: 267

In [2]:

```
# Q3 : palindrome

x = input("Enter your name: ")
x=x.casefold()
y=reversed(x)
if list(x) == list(y):
    print("The string is palindrome")
else:
    print ("The string is not palindrome")
```

Enter your name: Abdullah Wasim The string is not palindrome

In [5]:

```
# Q4 : Mark sheet
print("USMAN INSTITTUE OF TECHNOLOGY MARKSHEET 2019")
Name = str(input("Full name of the candidate:"))
Fathers_name = str(input("Fathers name of the candidate:"))
Roll_number = str(input("Allotted roll number of the candidate:"))
print("MARKS OBTAINED BY THE CANDIDATE")
ICT = int(input("Marks obtained in ICT:"))
BE = int(input("Marks obtained in BE:"))
PF = int(input("Marks obtained in PF:"))
English = int(input("Marks obtained in English:"))
Islamiat = int(input("Marks obtained in Islamiat:"))
Obtained_marks = ICT+BE+PF+English+Islamiat
print("Marks obtained by the candidate are :" , Obtained_marks)
Total marks = 500
Percentage = Obtained_marks/Total_marks*100
print("Your percentage is:",Percentage)
if Percentage>=80:
        print("Congratulations you have Obtained A+ Grade")
if Percentage<80 and Percentage>=70:
        print("Greateffort you have obtained A Grade")
if Percentage<70 and Percentage>=60:
        print("Nice try you have obtained B Grade")
if Percentage<60 and Percentage>=55:
        print("Work hard you have obtained C Grade")
if Percentage<55 and Percentage>=50:
        print("You have passed and pbtained D Grade")
if Percentage<50 and Percentage>=40:
        print("Failed better luck next time")
```
